Microsoft Vietnam

CONTEXT

This event is the first in a series of four East Asia policy seminars which will be held in Vietnam, Myanmar, Indonesia and the Thailand from August 2014 to December 2015. Each seminar has a specific and focused agenda, which frames debates and sharing on the eight core deep learning skills that school students of the 21st century require to be successful global citizens.

THEMES FOR THE VIETNAM SEMINAR

- National curriculum - raising educational standards in schools and helping students acquire skills for success in the modern world.
- 21st Century or Deep Learning skills - getting your students ready for future
- Designing digital transformation for holistic education reform to help students develop 21st century skills
- Inspiring student’s creativity and imagination through innovative teaching and learning in schools.

OBJECTIVES

- The seminar aims to:
- Update policy makers and educational practitioners on innovative teaching and learning practices to enhance student development of deep learning skills
 - Facilitate networking and sharing of policy developments and good practices in enhancing school teaching and learning
 - Facilitate dialogue among key players around designing digital transformation for education reform.
